†Institute for Electrical Measurement and Measurement Signal Processing, Inffeldgasse 23, A-8010 Graz, Austria

E-mail: corresponding.author@TUGraz.at

Abstract—These instructions give you guidelines for preparing digests for the IGTE Symposium. Use this document as a template if you are using Microsoft Word 6.0 or later. Otherwise, use this document as an instruction set. Define all symbols used in the abstract. Do not cite references in the abstract.

Index Terms—no more than 4 in alphabetical order.

I. INTRODUCTION

This document is a template for Microsoft Word versions 6.0 or later. If you are reading a paper version of this document, please download the electronic file, `igte.doc`, from `www.igte.tugraz.at/` → IGTE Symposium → Templates so you can use it to prepare your manuscript. If you would prefer to use L^AT_EX, download IGTE's L^AT_EX style and sample files from the same Web page. Use these template files for formatting.

II. ONE PAGE DIGEST

The one-page digest should contain the title of the paper, the authors and their affiliation, a short abstract, the main contents of the paper, preliminary results and references. The digest should be submitted as a PDF file, formatted in DIN A4 (2 column), via the IGTE Symposium web page.

A. Main Dates

Please check the deadline for the submission of the digest on the website.

B. Acceptance

Notification on acceptance or rejection of your contribution as well as details for submission of the full papers will be sent by e-mail.

III. DIGEST FORMAT

The text should be typed in Times New Roman font on A4 sheets, single spacing, two column format, margins 25mm above, 15mm below and 20mm on the right and on the left. Please do not number the pages.

Equations are referred by their number (1), and are centered. Number equations consecutively with equation numbers in parentheses flush with the right margin, as in (1).

$$\int_0^{r_2} F(r, \varphi) dr d\varphi = [\sigma r_2 / (2\mu_0)]. \quad (1)$$

Table I is an example of table and summarizes the used font sizes. Figure 1 is an example of figure.

Number citations consecutively in square brackets [1]. The sentence punctuation follows the brackets [2]. Multiple references [2], [3] are each numbered with separate brackets [1]-[3].

TABLE I
FONT SIZES

| Title | 22pt | bold |
|--------------------|------|------------|
| Authors | 12pt | normal |
| Affiliation | 10pt | normal |
| Abstract, Keywords | 9pt | bold |
| Text | 10pt | normal |
| References | 8p | normal |
| Table Caption | 8pt | capitalize |
| Figure Caption | 8pt | normal |
| Section Heading | 10pt | capitalize |
| Subsection Heading | 10pt | italic |

Figure 1: Magnetization as a function of applied field.

IV. CONCLUSION

Please use this template preparing your digest. If you have questions, please do not hesitate to contact the IGTE secretariat: `igtesymp@TUGraz.at`
